## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference <b>000165</b>	<b>FOR FURTHER ACTION</b> see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. <b>PCT/JP 00/07017</b>	International filing date (day month year) <b>06/10/2000</b>	(Earliest) Priority Date (day month year) <b>08/10/1999</b>
Applicant <b>CHUBUSHIRYO CO., LTD.</b>		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

### 1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing:

contained in the international application in written form.

filed together with the international application in computer readable form.

furnished subsequently to this Authority in written form.

furnished subsequently to this Authority in computer readable form.

the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority

6. The figure of the **drawings** to be published with the abstract is Figure No.

as suggested by the applicant.

because the applicant failed to suggest a figure.

because this figure better characterizes the invention.

1

None of the figures.

## INTERNATIONAL SEARCH REPORT

PCT/JP 00/07017

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 A23K1/00 A23K1/14 A23N17/00 A23K1/18

According to International Patent Classification (IPC) or to both national classification and IPC.

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 A23K A23N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, FSTA, BIOSIS

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

## Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- \*&\* document member of the same patent family

Date of the actual completion of the international search

(75) Inventors/Applicants (for US only): **TANAKA, Koji**

(54) Title: COMPRESSED SOLID FEED AND COMPRESSED SOLID FEED FORMING APPARATUS

(57) Abstract: Compressed solid feed is taught that includes fibrous plant materials, e.g. plant stalks and leaves, having a length of at least about 3 cm in at least 20 % of the total weight of the compressed solid feed. The compressed solid feed may have a density between about 4.0 to 0.6 g/cm<sup>3</sup>. A blended feed for ruminant livestock is also taught that comprises this compressed solid feed in at least 15 % of the total weight of the blended feed. An apparatus adapted to form compressed solid feed may include at least one die comprising a plurality of tapered raw material receiving spaces each having an inlet and an outlet and a plurality of pushing rods installed opposite to the inlets of the raw material receiving spaces. The pushing rods may be adapted to compress raw materials by reciprocating relative to the dies along the axial direction of the inlets and outlets of the raw material receiving spaces. Methods for making compressed solid feed are also taught and may preferably use such apparatus. These methods may include preparing a raw material that contains at least about 60% by weight of fibrous plant materials having a length greater than 3 cm, supplying the raw material to the raw material receiving spaces and compressing the raw material to form the compressed solid feed. Further, livestock can be fed using an automatic feed distributing machine to distribute the above-described blended feed and the need for other cellulose-based feed is eliminated.
